

Carlos Lopez

GAME DESIGNER

carjelosa@gmail.com

https://www.linkedin.com/in/carjelosa/

PROFILE

Game Designer with 10+ years of experience across AAA sports, mobile and casino games, specialising in **systems design, gameplay progression, player abilities, reward structures, level design and technical prototyping**.

I turn **player goals and design intent** into clear rules, scalable content pipelines and shippable features, working closely with engineering, production, QV and art.

My experience spans **data-driven progression, gameplay-facing mechanics, UI-facing systems and narrative-linked player choices**, with hands-on implementation across Frostbite, Unreal Engine and Unity.

I approach design **systemically**: connecting player motivation, moment-to-moment interactions, long-term progression and production constraints into experiences that can be tested, iterated and expanded.

SKILLS

Systems & Gameplay Design

Progression & Ability Design

Technical Prototyping

Level Design

Narrative Systems & Content

Economy & Balance Design

Player Motivation Loops

Live Service Design

GDDs & Feature Specs

TOOLS

Unreal Engine 5

Blueprints / C++

Frostbite

Unity / C#

Excel / SQL

Confluence / Miro / JaaS

Data-driven content tools

LANGUAGES

Spanish - Native

English - Professional proficiency

INTERESTS

Game Ideation

Short Story Writing

Music Composition

Science & Innovation

Dream Journaling & Analysis

WORK EXPERIENCE

Genera Games: Sevilla, Spain

Junior Game Designer (oct. 2015 - jun. 2017)

- Redesigned core loops and progression structures for F2P mobile games to improve retention and monetization.
- Designed, implemented and balanced Unity gameplay features across runner, racing, puzzle and tower defense games.
- Designed levels, tutorials, reward pacing and difficulty curves, iterating through hands-on gameplay validation.
- Implemented analytics hooks to support player-behaviour analysis and data-informed iteration.

TWS Inventors of Play: Malaga, Spain

Game Designer (dec. 2017 - jun. 2020)

- Designed slot and casino game systems using probability models, player-behaviour research and market constraints.
- Built Unity prototypes and C# simulation tools to validate mathematical profiles, feasibility, pacing and balance.
- Authored GDDs defining core gameplay flows, feature rules, reward logic and implementation requirements.
- Collaborated with mathematicians, backend developers and artists to transform abstract concepts into playable systems.

EA Sports: Madrid, Spain

Senior Game Designer (Jul. 2021 - Jul. 2026)

- Shipped EA SPORTS PGA TOUR 2023 after three years of fully remote development, working autonomously across its complete production cycle.
- Owned PGA TOUR player progression and skill growth: built the complete level-progression table and progression formulas, balancing XP, levels and long-term character growth.
- Expanded the golfer ability system by designing new ability unlocks around the existing Skill Points framework, linking progression choices to player build development.
- Designed gameplay and UI-facing systems for ball striking, defining how new shot interactions worked in play and how their state and feedback were represented to the player.
- Supported Madden NFL 25 through release, working on progression systems for player archetype creation and player abilities, including data-driven implementation and validation.
- Designed Sphere of Influence for Madden NFL 26 Superstar: an RPG-inspired relationship and progression system connecting player choices, character progression, rewards and narrative outcomes.
- Developed Madden NFL 27 systems and content planning across Sphere of Influence, Battle Pass and Side Activities; Side Activities combined narrative choices, character relationships, conflicts, rewards and progression.
- Built scalable progression, reward and content pipelines using Frostbite, SQL, Excel, custom tools and structured GDDs, collaborating with engineering, production and QV to ship testable player-facing systems.

EDUCATION

Level Design Mastery - Certificate of Completion (Feb. 2026 - May. 2026)

Stefan Zamfir | Layout planning, blockout workflows, encounter pacing and player-focused level design.

ESI: Escuela Superior Internacional (2012 - 2016)

3-year Game Design & Development programme covering game design, prototyping, C/C++/C#, rigging, 3D modelling and animation.

IES Ingeniero de la Cierva (2010 - 2012)

2-year higher programme in computing and coding: scripting patterns, JavaScript, Python and Android scripting.
